

A. Il piano della Fig. 4.8, sesto pannello
pieno = in stallo (113), vuoto = non in stallo (129)

B. Il ciclo spiega l'asse orizzontale
Spearman $\rho = +0.65$, $p < 10^{-6}$ ($n = 113$)
a T fissata: $\rho = +0.69$, $p < 10^{-6}$

C. Il ciclo non spiega quello verticale
Spearman $\rho = -0.15$, $p = 0.12$ ($n = 113$)
a T fissata: $\rho = +0.16$, $p = 0.11$
